

## Sample Lesson #1

### Creating a Bibliography

A **bibliography** is a listing of the sources used in the preparation of any paper, report, or presentation. There are different bibliography styles, and your teacher may want you to follow a certain style. Otherwise, follow the examples given here and in the *Help Pages*. Any book, article, interview, or other source that gives information for your report should be included in the bibliography or reference list — even if you do not quote anything from it.

A bibliography is arranged alphabetically by author's last name. The title of a book, periodical, or website is always underlined or typed in italics. The title of an article or a part of a larger work is set in quotation marks. For Internet articles, all of the suggested information may not be available, but you should list as much information as you can, and always include the complete URL or web address. Punctuation is very important in a bibliography. Use periods, commas, and colons as directed by your teacher or as shown in the examples. Also, notice that if the citation takes more than one line, the second line is indented.

#### Book

Author's last name, First Name. Title of Book.

City: Publisher, Date.

#### Example:

Granger, Thomas. River Canyons and Other Beauties.

Chicago: Prime Press, 2011.

#### Internet Article
